DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In this case, the specification fails to support a description of an information assistance system and a method for use in the information assistance system comprising an output device for providing directions based on the received information, in first and second installments, to a user device, an indicator being adjusted to indicate the last direction provided in the first installment; and a processor for monitoring for a triggering event initiated by the user device to start providing at least one direction in the second installment, the at least one direction being selected based on the indicator.
